

```
std::integral_constant  
< std::size_t, 1+sizeof...  
  (Components)>
```

The diagram illustrates the inheritance of the `std::tuple_size` trait. At the bottom is a grey box representing `std::tuple_size<::WAL::ViewEntity< Components... > >`. A blue arrow points upwards from this box to a white box above it. The white box contains the definition of `std::integral_constant` with the same template arguments: `std::integral_constant < std::size_t, 1+sizeof... (Components)>`. The white box is divided into three horizontal sections, with the code in the top section and empty space below.

```
std::tuple_size<::WAL  
::ViewEntity< Components... > >
```
